Local Climate Solutions with Poverty Reduction
Experiences from East Africa, South Asia, Europe

Intro by Gunnar Boye Olesen, INFORSE Coordinator

International Network for Sustainable Energy

- Network of 150 NGOs worldwide, formed in 1992
- An international voice of NGOs promoting renewables & energy efficiency
- Follow climate negotiations
- Lowcarbon Development Strategies, 100% renewables scenarios
- Eco-Village Solutions for Climate

Current activities in Africa, Europe, South Asia
At COP25, the countries:
- Reiterate the urgency of addressing the gap between aggregate NDCs and pathways to stabilize climate at 1.5-2.0 ‘C warming
- Call for enhanced implementation and ambition of mitigation and adaptation (enhanced NDCs in 2020)
- Recognise the urgent need for finance, technology, and capacity building for enhanced actions by developing countries
- Adopted the Gender Action Plan that includes integration of gender considerations in NDCs
NDC Guideline adopted at COP24

• NDC’s should include information on:
  • The NDC planning process including (information on) public participation and engagement with local communities and indigenous peoples, in a gender-responsive manner;
  • Contexts including sustainable development and poverty eradication
Solutions to include in NDCs’ are then

• Solutions that enhance mitigation and adaptation to meet the gaps (1CP25)

• Solutions that are selected in a process with public participation, engaging local communities in a gender responsive manner (NDC guidelines, Gender Action Plan)

• Solutions that enhance sustainable development and reduce poverty (NDC guidelines)

We will in the following show a number of solutions that meet these criteria and how INFORSE members disseminate and promote them, also for inclusion in NDC’s
Thank You
