

# *Renewable Heating & Cooling*

## INFORSE-Europe Proposals

Gunnar Boye Olesen

European Sustainable Energy Policy  
Seminar 2007, March 20, Brussels

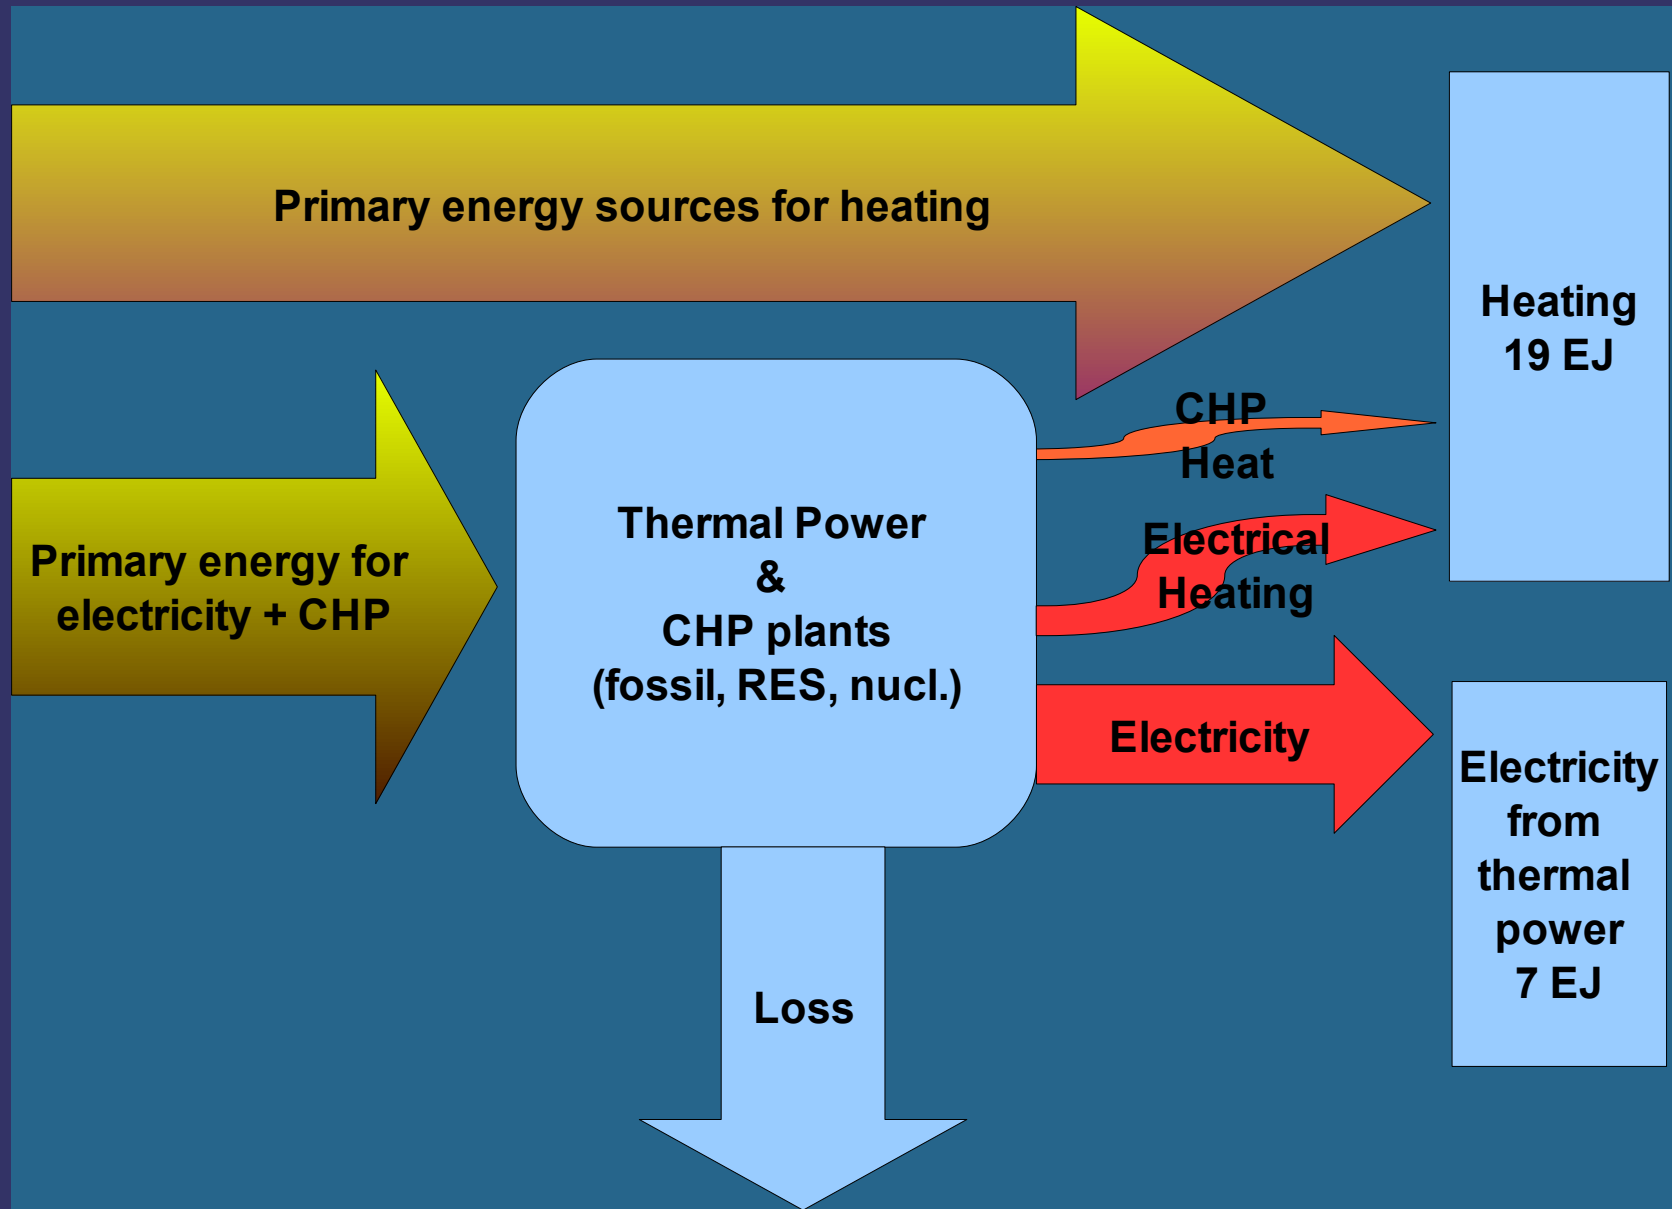

Organised by INFORSE, EUFORES, and EREF

[http://www.inforse.org/europe/seminar07\\_BXL.htm](http://www.inforse.org/europe/seminar07_BXL.htm)

# *Simple, inefficient heat and power supply*

*(example EU-15, year 2000)*

# INFORSE Vision

## EU15 Heat sources - INFORSE Vision

# ***INFORSE Proposals for Action***

- ➔ Agree with ESTIF-lead initiative, targets
- ➔ Barriers, incl. legal barriers to change from fossil to RE-heat must be removed
- ➔ New/renovated houses must be heated with renewables when cost-effective (like Barcelona solar ordinance)
- ➔ Public information on heat efficiency + RE
- ➔ District heating operators should purchase RE-heat from CHP + solar
- ➔ public sector should use RE-heat

***Thank you***
