

EU Neighbourhood Policy

By Gunnar Boyer Olesen and Yuri Matveev

Sustainable Energy Policy Seminar
October 1-5, 2007
Samsø, Denmark

http://www.inforse.org/europe/seminar07_samsø.htm

EU Neighbourhood Policy

- Belarus, Ukraine, and Moldova;
- Georgia, Armenia, and Azerbaijan;
- Morocco, Algeria, Tunisia, Libya, Egypt, Israel, Jordan, Lebanon, Syria, & the Palestinian Authority
- Ukraine and the EU have intensified relations and have most ambitious Neighbourhood Policies

2

Market Policy - Ukraine

- Convergence towards principles of the EU internal energy markets,
- Price developments towards convergence of the Ukrainian and the EU markets.
- Develop the National Electricity Reg. Comm.
- Internal gas sector restructuring plan.
- Restructure electricity sector / debt restruct.
- Participation in EU related energy events as appropriate, including gradual involvement in the European Gas and Electricity Regulatory fora.

3

Energy Networks - Ukraine

- Increase performance of networks, less loss
- Odessa-Brody-Poland oil pipeline (Ukraine Poland Agreement)
- Feasibility of interconnection of Uk. With UCTE
- Increase performance, of gas transit network.
- Possibilities for the financial/legal restructuring of the gas transit
- business including unbundling; and unbundling and transparency of accounts

4

Fossil Fuel Exploration

- Further implement Ukraine's mine restructuring plan. Reduce mine accidents, i.a. by gradually applying EU mine safety standards and practice.
- Advance in assessing the technical and financial feasibility of implementing clean coal technology and promotion of it.

5

Energy Efficiency and RE - Ukraine

- Explore the possibility for participation in IEE
- Action Plans for improving EE and RE use, reinforcing the institutions, timetables. Further implement existing plans in this area.
- Cooperation regarding energy conservation projects on the way.

6

Nuclear Safety - Ukraine

- Comply with the international nuclear safety standards in completing and starting up
- of the "K2R4" nuclear reactors; fully implement the MoU on the closure of Chernobyl
- Strengthen the State Nuclear Reg. Committee
- Agreement concluded with EURATOM
- progress in decommissioning of Chernobyl
- Continue work on the Chernobyl Shelter
- Should adopt a nuclear waste strategy.

7

EU Neighbourhood Energy Policy

- Market and norms
- Energy policy converging towards EU energy policy objectives
- Network (Energy – Road - Tele)
- Fossil fuel exploration and exploitation
- Energy efficiency and renewable energy
- Nuclear safety standards and radioactive waste management
