Objectives of Directive

- <u>Promotes cost-effective energy efficiency</u> with targets, mechanisms, incentives, institutional, financial & legal frameworks.
- To develop a commercially viable market for energy efficiency & energy services (market transformation).

15 June 2005 European Commission, Directorate-General for Energy and Transport

Scope

- Covers all energy suppliers (distributors and/or retailers) of: electricity, gas, district heating & cooling, heating oil, coal, lignite, <u>transport fuels</u>, etc. (Small companies may be excluded.)
- End-use sectors include:
 - -domestic, agricultural, public and tertiary sectors.
 - -non-energy intensive industries
 - -transport
 - -ET sector excluded (12,000 installations.)

5 June 2005 European Commission, Directorate-General for Energy and Transport

n° 4

Content on targets 1/2

- 1 % annual overall uniform target (Article 4):
 - cumulative to 2012; 6 years (EP wants 9-yr target; mandatory)
 target fixed; independent of GDP.
 - target fixed; independent of GDr.
 - early actions (1995) allowed; (1991). Unnecessary with individual targets.
 - -top-down allows impacts of market, tax changes; (double-counting a problem).
 - annexes: guidelines on M&V (MS want harmonised topdown/bottom-up and committee) EP: 1yr to negotiate differentiated, then uniform and increasing. Avg 1.3%/yr.)
- "white certificates" later. (Have gained in importance.)

15 June 2005 European Commission, Directorate-General for Energy and Transport

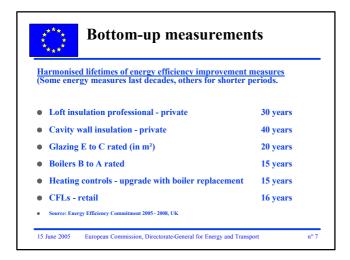

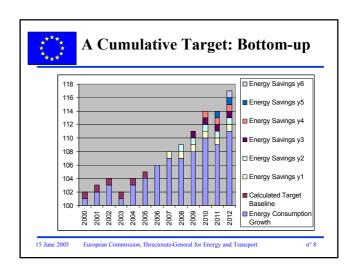

Content on targets 2/2

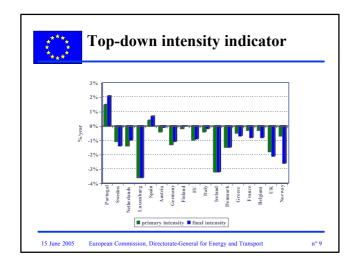

- 1,5 % annual public sector target (Article 5):
 - a sub-target of the overall 1 % target (PS=10%).
 - uses same methodology as overall target.
 - uses aggregated public procurement to increase demand for energy efficiency & energy services. Leadership by example.
- Precise definition of "public sector" difficult. M.S. do not want definition or public sector target, but only measures. Possible compromise: strong measures, within overall 1%.

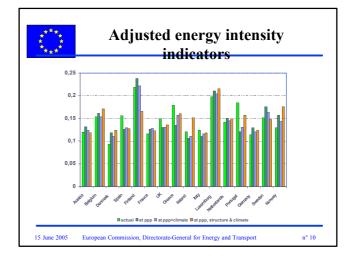

15 June 2005 European Commission, Directorate-General for Energy and Transport

nº 6

Benchmarking

- To establish indicators for all end-use sectors and sub-sectors. (A top-down calculation).
- To establish benchmarks to indicate which Member States need to improve and which are above benchmark.
- To track changes in intensities in sectors and subsectors for monitoring compliance with targets.
- Advantage: allows all market and non-market impacts to be credited.
- Has been introduced as an amendment by the EP.

15 June 2005 European Commission, Directorate-General for Energy and Transport

Procedure thus far

- European Parliament Plenary Vote on 7 june.
- Strong support in EP for mandatory target and strong Directive and 2nd reading.
- Luxembourg Presidency has worked hard on proposal. 28 June Energy Council: Political Agreement
- UK Presidency: will have Common Position soon and reach agreement in 2nd Reading by end of 2005..

15 June 2005 European Commission, Directorate-General for Energy and Transport

n° 12

The Way Forward

- Discussions in Council & E. P. constructive. Favour harmonised measurement regime. E.P. 3+3+3; 1.3%/yr. (3%)
- Committee to harmonise measurement system.
- Mixture of bottom-up & top-down. Increasing share of bottomup. Benchmarking included in top-down.
- Indicative vs. mandatory target: Commission & EP vs. Council.
- Public procurement target: Commission & EP vs. Council.
- White certificates and bottom-up: UK, IT, FR, DK, NL, BE(FL)
