## RENEWABLES IN NEW EU MS

	RE % of PE in 2001	Large hydro %	Biomass %
Cyprus	1,8	0	21,5
Czech Republic	1,5	28,1	71,9
Estonia	11,5	0,1	99,9
Hungary	1,6	3,9	94,3
Latvia	34,9	16,2	83,8*
Lithuania	8,5	4,1	95,9
Malta	0	0	0
Poland	4,5	4,9	95,0
Slovakia	3,9	58,4	40,4
Slovenia	10,7	44,6	55,4
<b>EU 15</b>	<b>5,8</b>		

\*more than 400 % increase during last 10 years.

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORSE-INFORSE-EREF Seminar

	RES-E % in 2001	RES-E excl. large hydro	RES-E % 2010
Cyprus	0.05	0.05	6.0
Czech	3.8	0.7	8.0
Estonia	0.2	0.2	5.1
Hungary	0.7	0.3	3.6
Latvia	42.4	0	49.3
Lithuania	3.3	n.a.	7.0
Malta	0.0	0	5.0
Poland	1.6	n.a.	7.5
Slovakia	17.9	0.5	31.0
Slovenia	29.9	0.7	33.6
<b>EU 10</b>	<b>5.6</b>		<b>11.0</b>
<b>EU 25</b>	<b>13.0</b>		<b>21.0</b>
IEA stat.2002

## Barriers and gaps

*„heritage" from the past*

**Availability of production capacity using fossil fuels**  
(centralized energy systems rely heavily on fossil fuels)

**Overcapacity for energy production.**

**Cheap indigenous fuels**  
(Estonia – more than 90% oil shale, Poland – coal).

**Domestic fuels** = energy at a lower price, more affordable by the society, employment and social issues, subsidies still in place.

**Legislation.** Lack of clear signals for long-term guarantees for return on investment in RES projects. It is unlikely to attract investors in short-term (most of CEE countries).

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORSE-INFORSE-EREF Seminar

## RE Policy Drivers

**EU 15:** environmental goals, commitments to mitigate climate change, energy security, trading opportunities.

**CEE:** job creation, need to modernize obsolete production capacities, energy security (resources and distr.), EU pressure (Directives).

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORSE-INFORSE-EREF Seminar

**Cyprus** is almost totally dependent on oil imports for its energy supply accounting for 91% of the primary energy supply.

The burden of cost of energy imports on the economy of Cyprus is considerable.

**3.6% energy is provided by solar thermal.**

**92% of all houses and 50% of the hotels have solar water heaters.**

**Most solar collectors per capita in the world.**

Governmental grants (30-40% of investments) for investments in wind energy systems, solar thermal, PV, biomass, landfill and sewage waste using RES.

There is a fixed purchase price for RES-E

Wind: first five years: 9,2 € cents/kWh,

PV up to 5 kW: 20,4 € cents/kWh

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORSE-INFORSE-EREF Seminar

**The Czech Republic**

RE-E Law (May, 2005) – based on DE,ESP - model for new EU MS

Target 8% RE-E in 2010 (now 3,8%).

**Minimum feed-in-tariffs guaranteed for 15 years .**

Tariffs set by the regulator on annual basis.  
Annual reduction of tariffs max. 5%.

RE operator can take „green bonus“ (diff. between market price and feed-in tariff) instead of purchased price.  
Co-firing is also the subject for „green bonus“ (gains for large coal, grain burning ?).

**Power grid operators (distributors) are obliged to connect RE operators** (if tech. req. are fulfilled).  
Detailed regulations will be published this year.

Large hydro is in (CEZ lobby), RE heat is out.  
Wind farms with more than 20 MW are out.  
Gas from closed coal mines is also in.

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**The Czech Republic**

Minimum prices in 2003:

Wind : 9.6 € ct/kWh  
Biomass & biogas: 8 € ct/kWh  
Small Hydro: 5 € ct/kWh  
PV: 19.2 € ct/kWh

Tax relief up to five years  
Low VAT rate (5% instead of 22%)  
for small facilities  
(hydropower: 0.1 MW,  
wind: 0.075 MW, all solar and biomass  
units).

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**SLOVENIA**

Promotion of RE via tax incentives.

CO<sub>2</sub> tax introduced in 1996 amounts to 15 €/t CO<sub>2</sub>.

Feed-in tariffs:

Hydro up to 1 MW:	6.11 €/kWh;
Hydro 1 to 10 MW:	5.89 €/kWh;
Biomass up to 1 MW:	6.98 €/kWh;
Biomass above 1MW:	6.76 €/kWh;
Wind up to 1 MW:	6.33 €/kWh;
Wind above 1 MW:	6.11 €/kWh;
Geothermal:	6.11 €/kWh;
Solar up to 36 kW:	27.85 €/kWh;
Solar above 36 kW:	6.11 €/kWh.

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**LATVIA**

**(49,4 % of RES-E in 1997)**

1996 - 2002 significant growth of RE based on so-called double tariff, phased out the 1<sup>st</sup> January 2003.

Tariff was double the average electricity price for a period of eight years after grid connection for wind and small hydro power plants (less than 2 MW).

Annual production at small hydropower plants increased from 2.5 to 30 GWh,  
Output from windpower plants increased to about 50 GWh.

Now the purchase tariff for small hydro power and power plants using waste or biogas is set at the average electricity sales tariff .  
Wind tariffs approved on a case-by-case basis by the regulator.

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**Poland**

Electric utilities should maintain a renewable energy portfolio of at least 2.4 percent in 2001 (2.5% in 2002; 2.65% in 2003, etc., 7.5% in 2010).

Target of 7.5% of primary energy production from RE by 2010 and 14% by 2020.

Targets have not yet been enforced, discouraging large scale renewable development .

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**HUNGARY**

70% of the total energy demand is imported.  
Investment incentives in force.  
Feed-in tariffs : between 7 and 11 € cents/kWh.

**SLOVAKIA**

Energy imports = 85% of energy supply  
Negligible support for RE, no tax incentives,  
Discouraging feed-in tariffs (3 € cents/kWh).  
Target for RES-E 19 % recently re-negotiated (originally 31 %).

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**STRUCTURAL FUNDS and RE**

**SF = DG REGIO**

**Funds for energy projects = DG TREN and DG RESEARCH**

The door is open, sufficient publicity is a problem (also in EU 15).

The UK's allocation of SF is EUR 16,6 billion (2000-2006).

3,2 million EUR grant aid to RE projects in Wales.

Implementation of RE projects is low.

Dialogue between energy and development experts is poor.

Development experts are not aware of the potential of RE for the development.

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

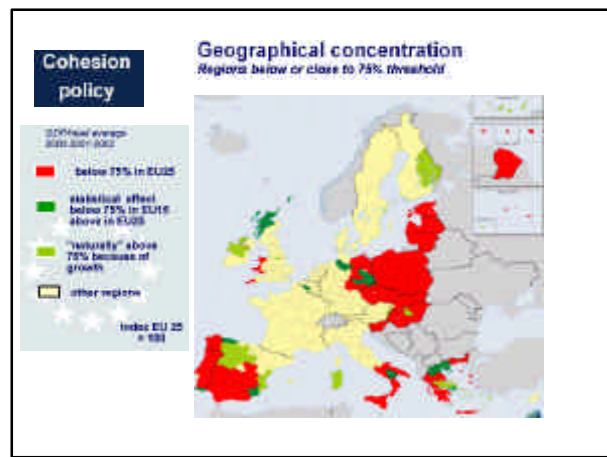

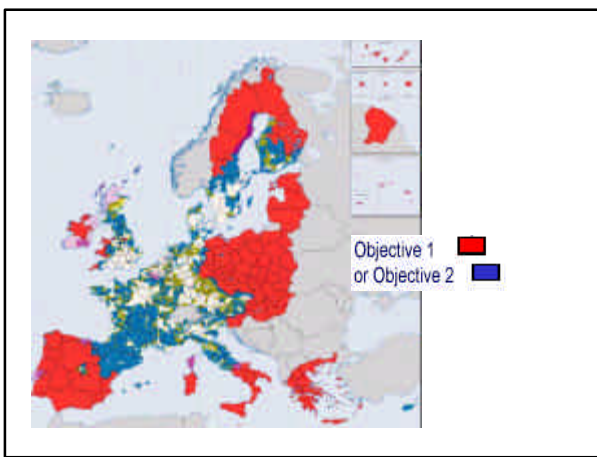

**The current objectives of the Structural Funds 2000-06**

- Objective 1: less developed regions
- Objective 2: regions with structural problems (industrial decline and rural areas)
- Objective 3: education, training and employment

**FINANCIAL RESOURCES**  
**About EUR 233 bn representing 1/3 of the EU's total budget or 0,45 % of EU's GDP**

**49.5% of the population in EU25 live in areas covered by Objectives 1 and 2**

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**Cohesion policy 2007-13**

- 1/3 of the EU budget (suggested is €336 billion at 2004 prices)
- +/- 0.41% of EU GNI
- More or less 50-50 between old and new Member States

Beg. 2006	Council adopts strategic guidelines on cohesion
2006	Preparation of programs for the period 2007-13
1 Jan 2007	Implementation

June 15, 2005 Brussels By Emil Bedi, INFORSE-Europe, EUFORES-INFORSE-EREF Seminar

**New programming period 2007-2013.**

**National Strategy Plans - harmonisation with EU strategy (2005).**

Schedule for Slovakia:

- Analysis of current state (March 2005),
- National vision on social and economical development until 2015 (May 2005),
- Setting of priorities, investments and co-funding resources etc (June 2005),
- Final Strategy Plan for Slovakia (December 2005).

- Slovakia priorities : Growth of GDP , market reforms
- Role of NGOs – Wales model?
